KNOWN LANGUAGES AND TECHNOLOGIES

WORK EXPERIENCE AND SIDE PROJECTS

AI Model for Telegram bot for Moscow Aviation Institute

The project is about classifying the question and sending the answer to it.

Also, the fine-tuned by-me sentiment analysis model was used in this project (https://huggingface.co/1kkiren/bert-base-cased-mms-ru-tuned).

Text multiplayer RPG on Solidity

A simple project made to study the BlockChain system. The project contains its in-game token. The pseudorandom technology was realized.

https://github.com/1kkiRen/RPG

AI Model for VibeChecker

The project was designed for the "[SUM23] Software Project" course.

The model counts the overall sentiment score and provides statistics of the YouTube video based on its comments.

ML Model for Sentiment Analysis

The project was made to study the basic principles of Natural Language Processing.

https://github.com/1kkiRen/Sentimental-Classifier

Participation in the Tutorship Program

My role as a tutor was to help 1st Bachelor's students adapt to the University, give them all useful information, and help to deal with any problems with their courses.

EDUCATION

Gymnasium N°12, Tver, Russia – 2011-2022

The class with in-depth study of mathematics and physics.

Innopolis University, Innopolis, Russia – 2022-now

The faculty of Data Science and Artificial Intelligence. Bachelor's degree.
